Estrovera®

Featuring EPr 731®

The nonhormonal menopausal relief you've been searching for*

-  EPr 731® has been clinically shown to reduce hot flashes by 83%*^{†1}
-  EPr 731® has been trusted by women and physicians for nearly 30 years
-  Convenient once-a-day dosing

Plant-Derived Menopausal Relief Is Possible.

For women around the world, the physical symptoms of menopause are an unavoidable—if uncomfortable—fact of life.

From inconvenient hot flashes to persistent vaginal dryness, the physical effects of this life change can leave you feeling frustrated, unhappy, and searching for affordable solutions.

If you are one of the millions of women searching for effective plant-derived relief, it's finally within your reach.

Derived from nature. Perfected by science.

Today, after nearly 30 years of safe, effective use in Europe, a plant-derived solution to reduce the uncomfortable physical symptoms of menopause—including hot flashes—is available to you.*²

Estrovera, featuring ERr 731[®], a special extract of Siberian rhubarb, delivers nonhormonal hot flash relief—with up to 83% decrease in daily hot flashes and other menopausal symptoms in a convenient once-a-day dose.*¹

Why Estrovera[®]?

Key ingredient

Estrovera delivers ERr 731[®], a plant-derived ingredient, demonstrated in clinical studies to significantly reduce menopausal hot flashes and multiple other symptoms compared to placebo.*¹

How Effective Is Estrovera?

- In a 12-week randomized controlled trial (RCT), ERr 731[®] reduced the number of daily hot flashes from 12 to 2—an 83% reduction*¹
- In a separate 12-week RCT study, ERr 731[®] reduced a wide range of other menopausal symptoms by 83%, including:*^{1,3,4}
 - Emotional stress
 - Sexual problems
 - Vaginal dryness
 - Sleep disturbances
 - Negative mood
 - Urinary tract discomfort
 - Physical and mental exhaustion
 - Irritability

¹Compared with perimenopausal women receiving placebo, those receiving ERr 731[®] (the extract found in Estrovera[®]) experienced a median 83% decrease in daily hot flashes.

^{1,3,4}Compared with perimenopausal women receiving placebo, those receiving ERr 731[®] (the extract found in Estrovera[®]) experienced decreases in symptoms as indicated by the mean reduction in individual Menopause Rating Scale scores.
